01 · EXECUTIVE SUMMARY

|               |                                                                                                  |
|---------------|--------------------------------------------------------------------------------------------------|
| Product       | AI SaaS — Academic & Accreditation Automation Platform for Indian Engineering Colleges           |
| Core Value    | Reduce 60–70% of faculty documentation time; AI-generate NBA/NAAC-compliant documents in minutes |
| Target Buyer  | HODs, IQAC Coordinators, Deans (Academic) — private engineering colleges, India                  |
| Revenue Model | B2B SaaS · Annual institutional licence █1.5L–█5L/yr · Freemium individual entry tier            |
| SAM           | ~1,200 private/autonomous engineering colleges · █240 Cr addressable                             |
| ARR Target    | █12–25 Cr at 5% SAM penetration within 3 years                                                   |
| Stage         | Pre-MVP · Problem validated · MVP build in progress                                              |
| Verdict       | █ <b>STRONG DEMAND SIGNAL — GO</b>                                                               |

02 · IDEAL CUSTOMER PROFILE & BUYER PERSONA

|               | Private autonomous engineering college | Affiliated private college            |
|---------------|----------------------------------------|---------------------------------------|
| Institution   | Private autonomous engineering college | Affiliated private college            |
| Geography     | TN · KA · TS · KL · AP                 | MH · GJ · RJ · WB                     |
| Size          | 500–3,000 students; 50–200 faculty     | 3,000–8,000 students                  |
| Accreditation | NBA/NAAC cycle due within 24 months    | Ongoing AQAR compliance               |
| Budget        | █75K–2.5L/yr (dept or institutional)   | █2.5L–5L/yr enterprise                |
| Champion      | IQAC Coordinator or HOD (CS/IT)        | Dean Academic post-HOD rec.           |
| Pain Trigger  | NBA visit scheduled; faculty burnout   | NIRF ranking goal; digitisation drive |

|           | 38–48                                                                      | 42–55                                               |
|-----------|----------------------------------------------------------------------------|-----------------------------------------------------|
| Age       | 38–48                                                                      | 42–55                                               |
| Tools     | Excel · Google Docs · WhatsApp · ERP (partial)                             | Dept Drive · WhatsApp · Excel · LMS                 |
| Goal      | NAAC 'A' grade; reduce audit workload                                      | NBA accreditation; faculty morale; better outcomes  |
| Pain      | 3–4 hrs/day on CO-PO sheets + AQAR entry                                   | Lesson plans, QP formats, CO mapping every semester |
| Trigger   | NBA visit 6 months away; mgmt pressure                                     | New semester; accreditation cycle begins            |
| Key Quote | "I know what needs documenting. I just don't have time to do it manually." | "My faculty are teachers, not data-entry clerks."   |

03 · TOP 10 CUSTOMER PAIN POINTS

| #  | PAIN POINT                                                | FREQ          | SEVERITY   | FacultyOS FIX                                 |
|----|-----------------------------------------------------------|---------------|------------|-----------------------------------------------|
| #1 | CO-PO mapping — manual Excel attainment calc              | Every sem     | █ Critical | AI auto-generates CO-PO matrix + attainment   |
| #2 | NBA/NAAC docs — SSR, AQAR, SAR preparation                | Every 3–5 yrs | █ Critical | Framework-compliant docs in hours, not months |
| #3 | Lesson plan creation — repeated every semester per course | Every sem     | █ High     | AI generates in minutes from syllabus input   |
| #4 | Question paper design — Bloom's + CO alignment            | Monthly       | █ High     | AI QP generator with Bloom's taxonomy tagging |

|     |                                                       |            |          |                                                     |
|-----|-------------------------------------------------------|------------|----------|-----------------------------------------------------|
| #5  | Course file assembly — compile all docs per course    | End of sem | ■ High   | Auto-assembled digital course file; export PDF/Word |
| #6  | Rubric design — assessment criteria for projects/labs | Per exam   | ■ Medium | AI rubric builder aligned to COs and POs            |
| #7  | Lab documentation — viva Q's, lab records, obs. books | Weekly     | ■ Medium | AI lab manual + viva question generator             |
| #8  | Faculty burnout from admin overload                   | Ongoing    | ■ High   | 60–70% time reduction = restored morale             |
| #9  | Project review rubrics + capstone milestone tracking  | Monthly    | ■ Medium | Structured rubric + milestone tracker               |
| #10 | NIRF data compilation + analytics                     | Annual     | ■ Medium | Auto-aggregate NIRF-required metrics across depts   |

#### 04 · CUSTOMER JOURNEY — Awareness → Advocacy

| STAGE             | TRIGGER                                                | EMOTION      | FacultyOS TOUCHPOINT                                       |
|-------------------|--------------------------------------------------------|--------------|------------------------------------------------------------|
| 1 · Awareness     | Colleague mention; LinkedIn; accreditation stress      | ■ Stressed   | SEO blog: 'NBA SAR in 7 days'; LinkedIn thought-leadership |
| 2 · Consideration | Demo video; feature comparison; WhatsApp faculty group | ■ Curious    | YouTube demo · webinar · feature comparison page           |
| 3 · Trial         | Signs up for free plan; generates first lesson plan    | ■ Surprised  | Freemium onboarding; instant-value wizard; aha moment      |
| 4 · Decision      | Shares with HOD/Dean; requests institutional demo      | ■ Optimistic | Custom demo · ROI calculator · proposal deck               |
| 5 · Onboarding    | Signs contract; imports syllabus; onboards faculty     | ■ Excited    | White-glove onboarding · 2-hr FDP · CSM support            |
| 6 · Expansion     | More depts onboard; NBA module unlocked                | ■ Delighted  | Usage analytics · upsell prompts · quarterly CSM review    |
| 7 · Advocacy      | Refers peer colleges; presents at conferences          | ■ Proud      | Referral programme · case study · speaker at FDPs          |

#### 05 · KEY OBJECTIONS & BUYING TRIGGERS

| KEY OBJECTION              | RESPONSE STRATEGY                                                                             | BUYING TRIGGER            | URGENCY                                  |
|----------------------------|-----------------------------------------------------------------------------------------------|---------------------------|------------------------------------------|
| "We already have an ERP"   | ERPs collect data — FacultyOS generates documents. Show side-by-side output comparison.       | NBA Visit Announced       | ■ EXTREME — panic-driven purchase        |
| "Faculty won't adopt"      | Start with 2–3 champions. Demonstrate time saved in one live session. 30-day zero-risk pilot. | New Semester Start        | ■ HIGH — lesson plan mandate Week 2      |
| "Data privacy concerns"    | Institutional data isolation; encryption; optional on-premise. SOC2 roadmap Year 2.           | Faculty Attrition/Burnout | ■ HIGH — mgmt forced to act              |
| "Price is too high"        | ROI: 4 hrs/wk × 50 faculty × semester = 800+ hrs saved. Show cost-per-hour vs subscription.   | Peer College Adopts Tool  | ■ MEDIUM — competitive FOMO              |
| "Not up for accreditation" | Lesson plans + QPs needed every semester. Daily productivity play — not just audit prep.      | NIRF Ranking Target       | ■ MEDIUM — data quality becomes critical |
| "AI output accuracy?"      | Live demo with their own syllabus. 'AI drafts, faculty finalises' = 80% effort saved.         | NEP 2020 Compliance Push  | ■ MEDIUM — govt mandate for digitisation |

#### 06 · MVP RECOMMENDATION & MoSCoW PRIORITISATION

| BUILD FIRST ■                                                                                                                                                                                                                                                                      | DON'T BUILD YET ■                                                                                                                                                                                                                                                                                                   |

08 · TOP 5 RISKS & MITIGATIONS

| #  | RISK                                        | LIKELIHOOD | IMPACT   | MITIGATION                                                                                        |
|----|---------------------------------------------|------------|----------|---------------------------------------------------------------------------------------------------|
| R1 | Solo founder execution bottleneck           | ■ High     | ■ High   | Ruthless prioritisation; hire part-time dev post first revenue; explore IIT/NIT co-founder        |
| R2 | Long institutional sales cycle (3–9 months) | ■ Certain  | ■ High   | Lead with faculty-direct freemium (bottom-up PLG); target IQAC coordinators with budget authority |
| R3 | ERP incumbents bundle AI features           | ■ Medium   | ■ High   | Build proprietary dataset trained on Indian accreditation frameworks; depth beats breadth         |
| R4 | AI output quality / hallucinations          | ■ Medium   | ■ High   | 'AI drafts, faculty finalises' positioning; feedback loop trains model on accepted outputs        |
| R5 | Budget constraints in Tier-II colleges      | ■ High     | ■ Medium | Freemium individual tier (■0); dept plan (■30K–75K); ROI-based pitch for institutional plan       |

09 · 30-DAY MVP PLAN

| WEEK             | FOCUS                            | KEY TASKS                                                                                                                                                                                                                                                           | PRIORITY   |
|------------------|----------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------|
| Week 1 Day 1–7   | Foundations & Customer Discovery | • Define MVP scope (2 core features: Lesson Plan + CO-PO) • Conduct 10 structured JTBD interviews (HODs, IQAC, faculty) • Set up landing page with waitlist CTA (Framer / HTML) • Define success metrics and pilot targets                                          | ■ Critical |
| Week 2 Day 8–14  | MVP Build Sprint                 | • Build AI Lesson Plan Generator (LLM API + syllabus input) • Build CO-PO Mapping Module (CO input → NBA Excel output) • Set up user auth + basic dashboard + PDF/Word export • Test with 3 beta faculty — get live feedback on output quality                      | ■ Critical |
| Week 3 Day 15–21 | Pilot Outreach & Iteration       | • Identify 10 target pilot institutions (TN/KA/TS; NBA cycle ≤18 mo) • Outreach to IQAC Coordinators via LinkedIn + WhatsApp + email • Run 3 live demos — use their actual syllabus live on screen • Fix top 3 usability issues from beta; improve AI output format | ■ Critical |
| Week 4 Day 22–30 | Close Pilots & Plan Month 2      | • Close 3 pilot institutions (free or ■5K/mo); get signed LOI • Document 2–3 case studies: time-saved + satisfaction scores • Apply to startup programmes: T-Hub, NASSCOM 10K, NSRCEL • Plan Month 2: add NBA SAR module or QP Generator next                       | ■ High     |

10 · FOUNDER ACTION SHEET — TOP 10 NEXT ACTIONS

| #   | ACTION                                                      | DEADLINE  | WHY IT MATTERS                                        |
|-----|-------------------------------------------------------------|-----------|-------------------------------------------------------|
| A1  | Conduct 10 structured customer interviews (JTBD)            | Day 1–5   | Validates assumptions; identifies #1 aha feature      |
| A2  | Launch simple landing page with waitlist CTA                | Day 3–4   | Builds pipeline; tests messaging before building      |
| A3  | Build AI Lesson Plan Generator (single-subject MVP)         | Day 6–9   | Fastest path to aha moment for faculty demo           |
| A4  | Build CO-PO Mapping Module → NBA Excel export               | Day 8–12  | Solves #1 critical pain; demo-able in 5 minutes       |
| A5  | Test with 3 trusted faculty colleagues (beta)               | Day 12–14 | Real feedback on output quality before public demo    |
| A6  | Identify 10 pilot institutions (TN/KA/TS; NBA < 18 mo)      | Day 15–16 | Shortlist targets before outreach begins              |
| A7  | Reach out to IQAC Coordinators + HODs via LinkedIn/WhatsApp | Day 15–20 | Founder credibility as ex-faculty = warm opens        |
| A8  | Run 3 live institutional demos (use their own syllabus)     | Day 17–21 | Live demo with real data converts skeptics instantly  |
| A9  | Close 3 pilot agreements (free or ₹5K/mo with LOI)          | Day 22–28 | First signal of commercial viability; case study data |
| A10 | Apply to T-Hub, NASSCOM 10K, NSRCEL startup programmes      | Day 20–30 | Non-dilutive support; credibility; founder network    |

■ FINAL VERDICT: STRONG DEMAND SIGNAL — GO

| REASON TO GO               | DETAIL                                                                                  |
|----------------------------|-----------------------------------------------------------------------------------------|
| Real recurring problem     | Accreditation complexity is increasing — pain is structural, not seasonal.              |
| Unfair founder advantage   | Lived the problem; can reach early customers via faculty network instantly.             |
| Zero AI-native competition | No AI-first, faculty-first product exists in India. Category creation opportunity.      |
| Perfect timing             | AI tooling mature; post-COVID digital shift; NBA/NAAC pressure at all-time high.        |
| Strong SaaS economics      | Annual contracts, high switching costs, natural expansion dept → institution.           |
| One key caution            | Solo founder risk is real. Focus on smallest aha moment first. Revenue before features. |
